

## SECTOR PROFILE:

# CYBER, IT AND DEFENCE SECTOR

## WHAT IS THE CYBER, IT AND DEFENCE SECTOR IN WORCESTERSHIRE?

The Cyber, IT and Defence sector is one of Worcestershire's priority sectors and is key to the future growth of Worcestershire's economy. The Midlands Cyber Cluster (located in Malvern,) is the regional Cyber Security Cluster for the West Midlands with responsibility for championing investment and networking within the sector.

Worcestershire was also the location for one of six Government backed 5G testbeds set up to explore the use of 5G technology with a particular focus manufacturing usage. The county even hosted the first UK 5G smart factory trials.

Software development and process automation continue to play a leading role, with the county being home to specialists in sectors including financial systems, communications, safety critical and embedded systems. Worcestershire is also a significant location for specialist defence systems manufacturing, testing and consultancy.

Gross value added (GVA) is an economic productivity metric that measures the contribution of a corporate subsidiary, company, or municipality to an economy, producer, sector, or region

Additional product specialisms include propeller hubs & blades, **missile fins, transmission casing and road wheels**.

## FUTURE OPPORTUNITIES

- The West Midlands has been indicated by the **DCMS** as the country's fastest growing tech sector. With average tech sector growth of 7.6% per annum between 2014 and 2019, the region has the potential to create and extra 52,000 tech jobs and add £2.7bn to the economy by 2025.
- Hard to reach homes and businesses in Worcestershire will benefit from the national **£5bn Project Gigabit** which will extend the reach of gigabit broadband services from November 2022.
- The cyber security sector continues to provide opportunities for growth both within Worcestershire and the UK as well as potential for increasing exports. Data for 2019 shows that UK cyber security exports were valued at £3.9bn (2018: £2.1bn), taking a leading share (55%) of total UK security exports.
- In addition, the undergraduate **CyberFirst** Bursary programme continues to attract students seeking future careers in the cyber security sector.
- The challenge for Worcestershire is to continue to attract, retain and grow evolving tech-based businesses through programmes and initiatives such as the **BetaDen Accelerator**, the **5G Testbed** and the expansion of the **Malvern Hills Science Park**.
